

TITLE

COMPOSITIONS OF ELECTRICALLY CONDUCTIVE POLYMERS AND  
NON-POLYMERIC FLUORINATED ORGANIC ACIDS

ABSTRACT

5           Compositions are provided comprising at least one conductive  
polymer and at least one non-polymeric fluorinated organic acid, wherein  
the conductive polymer is selected from a polythiophene, a polypyrrole, a  
polyaniline, and combinations thereof. Electronic devices and applications  
10   having at least one layer comprising such compositions are further  
provided.
